

**Status table on free allocation to industry and heat production for 2013**  
**Updated on 11 November 2013\***

<b>Member State</b>	<b>Number of Free Allowances in millions</b>	<b>Base National Allocation Table; Submission Date**</b>	<b>Reported changes for 2013 allocation; Submission Date***</b>	<b>European Commission Decision Date</b>	<b>Allocation Date</b>
Austria	22.75	5 November 2013			
Belgium	39.42				
Bulgaria	11.30				
Croatia	5.56				
Cyprus	0.94				
Czech Republic	25.74	29 October 2013			
Denmark	12.38	14 October 2013			
Estonia	3.10				
Finland	24.12				
France	88.37				
Germany	172.77				
Greece	16.16				
Hungary	12.55				
Ireland	5.58				
Italy	90.00				
Latvia	2.86	1 November 2013			
Lithuania	6.53	24 October 2013			
Luxembourg	1.38				
Malta	0				
Netherlands	50.38	6 November 2013			
Poland	64.63				
Portugal	12.11	8 November 2013			
Romania	29.49				
Slovakia	17.08	24 October 2013			
Slovenia	2.77				
Spain	70.68				
Sweden	28.92				
United Kingdom	68.97	22 October 2013			

<b>Total number of Member States at this stage of the process</b>	<b>9</b>	<b>0</b>	<b>0</b>	<b>0</b>
<b>Completion ratio in terms of allowances</b>	<b>25%</b>	<b>0%</b>	<b>0%</b>	<b>0%</b>

\* An update will be made available weekly.

\*\* Date when the Member State officially submitted to the European Commission the agreed final and correct version of its basic National Allocation Table.

\*\*\* Date when the Member State submitted the agreed changes based on 2012 production data (cessations, partial cessations or significant capacity reductions).

**Context:**

The basis for handing out free allowances in phase three is the national implementation measures (NIMs), adopted by the Commission on 5 September 2013, and the figures for the cross-sectoral correction factor, which was included in that same decision.

Based on the NIMs, which had to be updated with the cross-sectoral correction factor, each Member State has to prepare a base national allocation table (NAT) and submit it to the European Commission. The NAT serves as a basis for free allocation for the period 2013 to 2020.

Before free allowances can be handed out, each Member States must, every year, check and submit any changes to the base NAT to reflect reduced production or reduced capacity of installations in the preceding calendar year.

For the allocation year 2013 the Member States therefore have to submit both the base NAT (which will need to be submitted only once), and the relevant changes to this table based on data collected on production levels and capacity changes in 2012. Member States may submit the changes for 2013 allocation either simultaneously with or after the base NAT.

Once the European Commission has received and agreed to all the documents for a specific Member State, a Commission decision is taken for that Member State (the NAT Decision), which allows the Member State to submit this information to the ETS registry and proceed to allocate allowances.

At the time of adopting the NIMs decision the Commission estimated that the process to allocate allowances for the year 2013 would take up to three months. Though many Member States have submitted draft NATs or are in the process of doing so, it now appears likely that the process will take longer to complete in most Member States. The Commission is pro-actively supporting Member States in their tasks, and underlining the importance of a speedy finalisation of the process.

This table is for information purpose only.
